

## Index – Minimum Construction Standards & Specifications

accent plants, II-9 and II-11  
access for inspections, I-7  
Agru Sure-Grip HDPE Liner, IV-4 and Construction Detail #61  
air conditioning condensate, II- 5  
air release valves for force mains, IV- 12 and Construction Detail #58  
air release valves for reclaimed water system, V-7 and Construction Detail #89  
air release valves for sanitary, IV- 3  
air release valves for water system, III-3, III- 12, Construction Detail #40 and #41  
allowable leakage, reclaimed water mains, V-9  
allowable leakage, water mains, III-5

backfill gravity sewer mains, IV-3  
backfill, II- 7  
backflow prevention devices required, III-1  
backflow prevention devices, III- 13  
bacteriological tests, III- 7  
ball valves for water system, III- 12  
bill of sale, Exhibit “H”  
blow off, temporary, Construction Detail #23  
booster pump required, III-1  
buoyancy calculations, IV-5  
butterfly valves for reclaim water system, V-2  
butterfly valves for water system, III- 12  
butterfly valves testing, III- 8

caisson construction, wet well, IV-9 and Exhibit “F”  
canal crossing, Construction Detail #12  
cannon flushing procedure, Construction Detail #24  
cannon flushing, reclaimed water mains, V- 8  
cannon flushing, water mains, III-4  
casing installation, Construction Detail #7  
casing spacers, Construction Detail #8  
cement mortar lining of water mains, III- 9  
check valves for water system, III- 12  
chemical degreasers, IV- 25  
cleaning reclaimed water mains, V- 8  
cleaning water mains, III-4  
clean out, Construction Detail #57  
coating and lining repairs, II-8  
compound water meter, III- 13  
concrete, sanitary system, IV- 21

concrete, water system, III- 13  
construction dewatering, I-5  
construction plan preparation requirements, II-5  
construction safety, I-5  
construction water, I-7  
contractor's license verification, Exhibit "C"  
control panel, lift station, IV-7  
control panel, reclaimed water system, V-3  
cooling tower blowdown, II- 5  
copper tubing for water service, III- 10  
copper water services, III- 10  
cover requirements, II-2  
cover sheet, II-6  
curb stops for water services, III- 10

defective materials, I-2  
degreasers, IV- 25  
disinfection of water mains, III-6  
driveways to be shown on plans, II- 6

easement, lift station, IV- 11  
easement, reclaimed water metering facility, V-4  
easements, I-4, II-3, II-4,II- 6 and Exhibit "G"  
electrical power, lift stations, IV-6  
electrical power, reclaimed water, V-4  
embedment materials, II- 7  
Encroachment Agreement, II-3  
exfiltration rate, gravity sewer mains, IV- 17  
exfiltration test, IV- 3 and 17  
existing utility notification, I- 6

fan guard, Construction Detail #13  
faulty workmanship, I-2  
Fernco couplings, IV- 20  
finish floor elevations, II-5  
finished grade, II- 4  
fire flow requirements, II-4 and II- 7  
fire hydrant extensions, III- 12  
fire hydrant installation, Construction Detail #25  
fire hydrant tee installation, Construction Detail #27  
fire hydrants, III-4, III- 11  
fireline, above ground, Construction Detail #34

fireline with domestic supply, Construction Detail #35

Fire Marshall approval, II-6

flanged pipe for water system, III- 9

flow rate indicator, reclaimed water, V- 5

flushing hydrant, Construction Detail #22

flushing, reclaimed water mains, V- 8

flushing water mains, III-4 and III-5

force mains, installation, IV- 11

force mains, IV-2 and IV-3

force mains, private, IV-1

gate valves for water system, III- 12

gravity sewer mains between dwelling units, II-1

grease interceptors, IV- 23

grease trap, IV-1, IV- 23 to IV-27, and Construction Detail #59

ground cover type plants, II- 9 and II- 10

grout, water system, III- 13

grout mixture design, II- 9

grout, sanitary system, IV- 21

guarantee, I-2

hazardous substances, II- 5

hydrant extensions, III-4 and III-12

hydraulic design, water system, III-2

hydraulic design, sanitary system, IV-1

improvements installed over water or sewer facilities, II- 3

industrial wastes, IV-1

infiltration test, IV- 17

inspections, I-6

inspectors, authority, I-6

installation of reclaim system instrumentation, V-5

installation of water mains, III- 3

installation protocol, II-6 and Construction Detail #15

instrumentation & controls, reclaimed water, V-4

invasive plants, II- 10

lamping, sewer mains, IV-3

landscape guidelines, I-7, II- 9 and Construction Detail #90 and #91

landscaping in authority easements, I-8, II- 9

landscaping plan, II- 9 and II-12

laterals, sanitary service, IV- 19  
leakage test, reclaimed water mains, V-8  
leakage test, water mains, III-5  
lift station backflow assembly, Construction Detail #38  
lift station calculations, II- 16  
lift station control panel, IV-6 and Construction Detail #64a to #66  
lift station depth, IV-2  
lift station design, IV- 8 and Construction Detail #63 to #70  
lift station power supply, IV-6 and 7  
lift station telemetry, IV-7  
lift station wet wells, IV- 4, IV- 9, and IV- 10  
lift stations, private, IV-1  
looping of water mains, III-1  
low pressure sewer systems, IV- 13 and Construction Detail #71 to #75

main extensions required, II-1  
manhole cover and frame, IV- 20 and Construction Detail #50  
manhole depth, IV-2  
manhole inserts, watertight, IV-4  
manhole invert channels, Construction Detail #51  
manholes, drop through, IV- 4  
manholes, drop, IV-4, Construction Detail #53 and #54  
manholes, IV- 4 and Construction Detail #52  
master plan sheet, II-5  
master plan, II-1  
materials, reclaimed water system, V-1  
materials, sanitary system, IV- 20  
materials, water system, III- 9  
maximum cover, II-2  
mechanical joint fittings for water system, III- 9  
megalugs, III-3  
metering facility, reclaimed water, V-4 and Construction Detail #80 to #87  
meter, reclaimed water, V-3  
meter and backflow assembly, Construction Detail #33, #36, and #37  
meter box, water, III- 13  
meter enclosure, water, III- 13  
meter fee, water, III- 13  
meter location, water, III- 2  
minimum cover, II-2  
mortar, sanitary system, IV- 21  
mortar, water system, III- 13  
mortgagee joinder and consent, Exhibit "G"

muck, II- 7

NPDES Construction Activities Permit, I-5

nuisance trees, II- 11

oil separator, Construction Detail #60

Omni marker, force mains, IV- 11

Omni marker, reclaimed water system, V- 7

Omni marker, Sanitary Laterals IV-19

Omni marker, water system, III-3 and III-8

operation & maintenance manual, reclaimed water system, V-6

operations of existing facilities, I-6

pack joint fittings for water services, III- 10

paint system for above ground piping, II- 8

paint, above grade reclaim water piping, V-1

paint, above grade water piping, III- 13

paint, lift station, IV-9

palm trees, II- 9

pavement replacement, Construction Detail #5

paving and drainage plan, II-6

permits, I-3

pigging, force mains, IV-3

pigging, reclaimed water mains, V- 8

pigging, water mains, III- 5

pipe casing spacers, Construction Detail #8

pipe deflection, Construction Detail #14

pipe plug, polyethylene, III-4

pipe restraint table, Construction Detail #6

pipe support, Construction Detail #32

piping crossings, II- 6

piping orientation, II-1

plan availability, I-3

plan submittal prerequisite checklist, II- 12

plan submittal review procedures, II- 11

plans and specifications, I-3

plans on 24" x 36" sheets, II-5 and II-6

plans, scale, II-5 and II-6

plat, I-4

plat, preliminary, II-6

plans kept on site, I-3  
plug valves, sanitary, IV- 3 and IV- 22  
polyethylene tubing for water service, III- 10  
preconstruction meeting, I-3  
pre-engineering meeting, I-1 and II-1  
pressure test, force mains, IV- 13  
pressure test, reclaimed water mains, V-8 and V-9  
pressure test, water mains, III- 5 and III- 6  
pretreatment procedures, II- 5  
problem trees, II- 10  
profiles, II-5  
prohibited discharges to sewer system, II- 5  
project built in phases, II- 6  
protective enclosures, Construction Detail #31  
pumping station design, IV-5

record drawing submittal guide, Exhibit "E"  
record drawings, I-7  
refrigeration condensate, II- 5  
repair to new facilities, I- 8  
replacement of existing facilities required, II- 3  
resilient seat valves, sanitary, IV- 22  
restraint joint system, force mains, IV- 12  
restraint joint system, reclaimed water, V- 7  
restraint joint system, water, III-3  
reverse osmosis reject water, II- 5  
Rezklad 125S-AR, IV- 5  
root barriers, II- 10

sample point, fire hydrant, Construction Detail #21  
sample point, in-line, Construction Detail #20  
sample taps, III- 7  
sandblasting above ground piping, II-7  
sanitary service clean out, Construction Detail #57  
sanitary system materials, IV- 20  
screening of backflows, II- 16  
separation requirements, II-1 and Construction Detail #2  
separation requirements, reclaim water, V-1  
service connections, II-4  
service interruption, scheduling, I-6

service laterals, IV-1, IV-19 and Construction Detail #55  
service line identification, sanitary, IV- 19  
service line locations, I-6  
setback requirements, II-2  
sewer alignment, IV-2  
sewer fittings, gravity, IV-2  
sewer service transition from C-900, Construction Detail #56  
Sewer Guard, IV-4  
sewer maximum slope, II- 16  
sewer slopes, IV-1  
sewer systems, low pressure, IV- 13  
sewer systems, non residential low pressure, IV-14  
sewer systems, residential low pressure, IV- 16  
Sewer Coat, IV-4  
shop drawings, I-4  
shop drawings, reclaim system instrumentation, V-5  
shop specifications, I-4 and Exhibit "D"  
shrubs, II- 4 , II-9 and II-10  
signs for reclaimed water, Construction Detail #88  
softener brine, II- 5  
solids interceptor, IV- 26  
solids retention device, IV-1  
special project requirements, I-1  
steel casing installation, Construction Detail #7  
Stormwater Pollution Prevention Plan (PPP), I-5  
streetlights to be shown on plans, II- 6  
subaqueous crossings, II- 5 and Construction Detail #11  
submetering, II-4  
Sunshine State One-Call, I- 6  
survey, II-6  
surveyor's certification, Exhibit "C"  
switch cabinets to be shown on plans, II-6

tapping and main clearing procedure, Construction Detail #3  
tapping saddles for water services, III- 10 and III-11  
tapping sleeves for force mains, IV- 13  
tapping sleeves for reclaimed water, V-7  
tapping sleeves for water services, III- 4 and III- 10  
telemetry, reclaimed water, V-3  
telemetry, sanitary, IV-7 and IV-8  
telephone signal booster stations to be shown on plans, II-6  
telephone splice boxes to be shown on plans, II-6

televising sewer laterals, I-7  
testing, reclaimed water system, V-6  
testing, sanitary, IV- 17  
testing, water mains, III- 5  
thrust blocks, Construction Detail #9  
thrust blocks for water system, III-3, III-8  
thrust restraint system, III-3  
tie rods, III-3  
title insurance, I-5  
totalizer, reclaimed water, V-5  
toxic substances, II- 5  
transformers to be shown on plans, II-6  
treated groundwater, II- 5  
trenching procedure, Construction Detail #4  
tree, small, II- 10

unauthorized connections, I-6  
unsuitable materials, II- 7  
utilities to be shown on plans, II-5  
utility plan, II- 7

valve boxes, reclaim water system, V-2  
valve boxes, sanitary system, IV- 22  
valve boxes, water system, III-10 and III- 12  
valve extension, Construction Detail #16  
valve installation, Construction Detail #10  
valves, water system, III- 12

water meter installation, III- 7  
water service line identification, III-7  
water service line installation, III- 7, Construction Detail #28 and #29  
water service magnetic marker, III- 8  
water service tap under pavement, Construction Detail #30  
water system installation of valves, III- 8  
water system materials, III- 9  
water system restraint joint system, III- 8  
wet wells, IV-6  
wing plug on lines under construction, II-7  
workmanship, I-2
