

Index – Minimum Construction Standards & Specifications

accent plants, II-8 and II-9
access for inspections, I-7
Agru Sure-Grip HDPE Liner, IV-4 and Construction Detail #61
air conditioning condensate, II-4
air release valves for force mains, IV-11 and Construction Detail #58
air release valves for reclaimed water system, V-7 and Construction Detail #89
air release valves for sanitary, IV-2
air release valves for water system, III-3, III-10, Construction Detail #40 and #41
allowable leakage, reclaimed water mains, V-8
allowable leakage, water mains, III-5

backfill gravity sewer mains, IV-3
backfill, II-6
backflow prevention devices required, III-1
backflow prevention devices, III-12
bacteriological tests, III-6
ball valves for water system, III-10
bill of sale, Exhibit "I"
blow off, temporary, Construction Detail #23
booster pump required, III-1
buoyancy calculations, IV-5
butterfly valves for reclaim water system, V-2
butterfly valves for water system, III-10
butterfly valves testing, III-7

caisson construction, wet well, IV-9 and Exhibit "G"
canal crossing, Construction Detail #12
cannon flushing procedure, Construction Detail #24
cannon flushing, reclaimed water mains, V-7
cannon flushing, water mains, III-4
casing installation, Construction Detail #7
casing spacers, Construction Detail #8
cement mortar lining of water mains, III-8
check valves for water system, III-10
chemical degreasers, IV-23
cleaning reclaimed water mains, V-7
cleaning water mains, III-4
clean out, Construction Detail #57
coating and lining repairs, II-7

Minimum Construction Standards & Specifications

compound water meter, III-11
concrete, sanitary system, IV-19
concrete, water system, III-12
construction dewatering, I-5
construction plan preparation requirements, II-5
construction safety, I-5
construction water, I-7
contractor's license verification, Exhibit "E"
control panel, lift station, IV-6
control panel, reclaimed water system, V-3
cooling tower blowdown, II-4
copper tubing for water service, III-8
copper water services, III-8
cover requirements, II-2
cover sheet, II-6
curb stops for water services, III-9

defective materials, I-2
degreasers, IV-23
disinfection of water mains, III-6
driveways to be shown on plans, II-5

easement, lift station, IV-10
easement, reclaimed water metering facility, V-4
easements, I-4, II-5 and Exhibit "H"
electrical power, lift stations, IV-6
electrical power, reclaimed water, V-4
embedment materials, II-6
Encroachment Agreement, II-3
exfiltration rate, gravity sewer mains, IV-3
exfiltration test, IV-15
existing utility notification, I-5

fan guard, Construction Detail #13
faulty workmanship, I-2
Fernco couplings, IV-19
finish floor elevations, II-5
finished grade, II-5
fire flow requirements, II-4 and II-6
fire hydrant extensions, III-10
fire hydrant installation, Construction Detail #25

Minimum Construction Standards & Specifications

fire hydrant tee installation, Construction Detail #27
fire hydrants, III-4, III-9 and III-10
fireline, above ground, Construction Detail #34
fireline with domestic supply, Construction Detail #35
Fire Marshall approval, II-6
flanged pipe for water system, III-8
flow rate indicator, reclaimed water, V-4
flushing hydrant, Construction Detail #22
flushing, reclaimed water mains, V-7
flushing water mains, III-4
force mains, installation, IV-10
force mains, IV-2 and IV-3
force mains, private, IV-1

gate valves for water system, III-10
gravity sewer mains between dwelling units, II-1
grease interceptors, IV-21
grease trap, IV-1, IV-21 to IV-25, and Construction Detail #59
ground cover type plants, II-8 and II-9
grout, water system, III-12
grout mixture design, II-8
grout, sanitary system, IV-19
guarantee, I-2

hazardous substances, II-4
hydrant extensions, III-4
hydraulic design, water system, III-2
hydraulic design, sanitary system, IV-1

improvements installed over water or sewer facilities, II-2
industrial wastes, IV-1
infiltration test, IV-15
inspections, I-6
inspectors, authority, I-6
installation of reclaim system instrumentation, V-5
installation of water mains, III-2
installation protocol, II-6 and Construction Detail #15
instrumentation & controls, reclaimed water, V-4
invasive plants, II-9

Minimum Construction Standards & Specifications

lamping, sewer mains, IV-3
landscape guidelines, I-7, II-8 and Construction Detail #90 and #91
landscaping in authority easements, I-8 and II-8
landscaping plan, II-6
laterals, sanitary service, IV-17
leakage test, reclaimed water mains, V-8
leakage test, water mains, III-4 and III-5
lift station backflow assembly, Construction Detail #38
lift station calculations, II-15
lift station control panel, IV-6 and Construction Detail #64a to #66
lift station depth, IV-2
lift station design, IV-5 and Construction Detail #63 to #70
lift station power supply, IV-6
lift station telemetry, IV-7
lift station wet wells, IV-6, IV-8, and IV-9
lift stations, private, IV-1
looping of water mains, III-1
low pressure sewer systems, IV-12 and Construction Detail #71 to #75

main extensions required, II-1
manhole cover and frame, IV-18 and Construction Detail #50
manhole depth, IV-2
manhole inserts, watertight, IV-4
manhole invert channels, Construction Detail #51
manholes, drop through, IV-2
manholes, drop, IV-4, Construction Detail #53 and #54
manholes, IV-3 and Construction Detail #52
master plan sheet, II-5
master plan, II-1
materials, reclaimed water system, V-1
materials, sanitary system, IV-18
materials, water system, III-7
maximum cover, II-2
mechanical joint fittings for water system, III-8
megalugs, III-3
metering facility, reclaimed water, V-4 and Construction Detail #80 to #87
meter, reclaimed water, V-2
meter and backflow assembly, Construction Detail #33, #36, and #37
meter box, water, III-11
meter enclosure, water, III-11
meter fee, water, III-11
meter location, water, III-1
minimum cover, II-2

Minimum Construction Standards & Specifications

mortar, sanitary system, IV-19
mortar, water system, III-12
mortgagee joinder and consent, Exhibit "H"
muck, II-6

NPDES Construction Activities Permit, I-5
nuisance trees, II-9

oil separator, Construction Detail #60
Omni marker, force mains, IV-10
Omni marker, reclaimed water system, V-6
Omni marker, water system, III-3
operation & maintenance manual, reclaimed water system, V-6
operations of existing facilities, I-6

pack joint fittings for water services, III-9
paint system for above ground piping, II-7
paint, above grade reclaim water piping, V-1
paint, above grade water piping, III-11
paint, lift station, IV-9
palm trees, II-8
pavement replacement, Construction Detail #5
paving and drainage plan, II-6
permits, I-3
pigging, force mains, IV-3
pigging, reclaimed water mains, V-7
pigging, water mains, III-4
pipe casing spacers, Construction Detail #8
pipe deflection, Construction Detail #14
pipe plug, polyethylene, III-4
pipe restraint table, Construction Detail #6
pipe support, Construction Detail #32
piping crossings, II-5
piping orientation, II-1
plan submittal prerequisite checklist, II-11
plan submittal review procedures, II-10
plans and specifications, I-3
plans on 24" x 36" sheets, II-5
plans, scale, II-5
plat, I-4
plat, preliminary, II-6

Minimum Construction Standards & Specifications

plans kept on site, I-3
plug valves, sanitary, IV-2 and IV-20
polyethylene tubing for water service, III-8
preconstruction meeting, I-3
pre-engineering meeting, I-1 and II-1
pressure test, force mains, IV-16
pressure test, reclaimed water mains, V-8
pressure test, water mains, III-4 and III-5
pretreatment procedures, II-4
problem trees, II-9
profiles, II-5
prohibited discharges to sewer system, II-4
project built in phases, II-5
protective enclosures, Construction Detail #31
pumping station design, IV-5

record drawing submittal guide, Exhibit "F"
record drawings, I-7
refrigeration condensate, II-4
repair to new facilities, I-7
replacement of existing facilities required, II-2
resilient seat valves, sanitary, IV-20
restraint joint system, force mains, IV-11
restraint joint system, reclaimed water, V-6
restraint joint system, water, III-3
reverse osmosis reject water, II-4
Rezklad 125S-AR, IV-4
root barriers, II-9

sample point, fire hydrant, Construction Detail #21
sample point, in-line, Construction Detail #20
sample taps, III-6
sandblasting above ground piping, II-7
sanitary service clean out, Construction Detail #57
sanitary system materials, IV-18
screening of backflows, II-15
separation requirements, II-1 and Construction Detail #2
separation requirements, reclaim water, V-1
service connections, II-4
service interruption, scheduling, I-6
service laterals, IV-1, IV-17 and Construction Detail #55
service line identification, sanitary, IV-17

Minimum Construction Standards & Specifications

service line locations, I-6
setback requirements, II-2
sewer alignment, IV-2
sewer fittings, gravity, IV-2
sewer service transition from C-900, Construction Detail #56
Sewer Guard, IV-4
sewer maximum slope, II-14
sewer slopes, IV-1
sewer systems, low pressure, IV-12
sewer systems, non residential low pressure, IV-14
sewer systems, residential low pressure, IV-15
Sewer Coat, IV-4
shop drawings, I-4
shop drawings, reclaim system instrumentation, V-5
shop specifications, I-4 and Exhibit "D"
shrubs, II-8 and II-9
signs for reclaimed water, Construction Detail #88
softener brine, II-4
solids interceptor, IV-24
solids retention device, IV-1
special project requirements, I-1
steel casing installation, Construction Detail #7
Stormwater Pollution Prevention Plan (PPP), I-5
streetlights to be shown on plans, II-5
subaqueous crossings, II-4 and Construction Detail #11
submetering, II-4
Sunshine State One-Call, I-5
survey, II-6
surveyor's certification, Exhibit "F"
switch cabinets to be shown on plans, II-6

tapping and main clearing procedure, Construction Detail #3
tapping saddles for water services, III-9
tapping sleeves for force mains, IV-11
tapping sleeves for reclaimed water, V-7
tapping sleeves for water services, III-3 and III-9
telemetry, reclaimed water, V-3
telemetry, sanitary, IV-7 and IV-8
telephone signal booster stations to be shown on plans, II-6
telephone splice boxes to be shown on plans, II-6
televising sewer laterals, I-7
testing, reclaimed water system, V-6
testing, sanitary, IV-15

Minimum Construction Standards & Specifications

testing, water mains, III-4
thrust blocks, Construction Detail #9
thrust blocks for water system, III-3 and III-8
thrust restraint system, III-3
tie rods, III-3
title insurance, I-5
totalizer, reclaimed water, V-5
toxic substances, II-4
transformers to be shown on plans, II-6
treated groundwater, II-4
trenching procedure, Construction Detail #4
tree, small, II-9

unauthorized connections, I-6
unsuitable materials, II-6
utilities to be shown on plans, II-5
utility plan, II-6

valve boxes, reclaim water system, V-2
valve boxes, sanitary system, IV-20
valve boxes, water system, III-10 and III-11
valve extension, Construction Detail #16
valve installation, Construction Detail #10
valves, water system, III-10

water meter installation, III-6
water service line identification, III-7
water service line installation, III-6, Construction Detail #28 and #29
water service magnetic marker, III-7
water service tap under pavement, Construction Detail #30
water system installation of valves, III-7
water system materials, III-7
water system restraint joint system, III-7
wet wells, IV-6
wing plug on lines under construction, II-7
workmanship, I-2
