SEACOAST UTILITY AUTHORITY
ADMINISTRATIVE DIVISION
MEMORANDUM

TO: Seacoast Utility Authority Board
FROM: Rim Bishop, Executive Director
DATE: July 28, 2021
RE: **PROPOSED OPERATING AND CAPITAL BUDGET**
FISCAL YEAR BEGINNING 10/1/2021

Enclosed is the proposed Fiscal Year (FY) 2021/2022 Seacoast Utility Authority (Authority) Operating and Capital Budget (Budget). This transmittal memo will outline the baseline assumptions upon which revenue and expense projections are formulated and provide additional detail for specific line items. The proposed FY2021/2022 Budget reflects a combination of both historical and “zero base” budgeting techniques. In general, historical figures are used where a line item is comprised of small and dissimilar components, too numerous to individually analyze effectively, or where there is no way to accurately predict expenses. Recurring operating expense items, capital expenditures, and most revenue figures are zero based.

INDEXED RATE INCREASE RECOMMENDATION

Ordinance 2-2010 authorizes adjustment to all Authority water, sewer, and reclaimed water rates effective October 1:

by an amount not to exceed the percentage increase or decrease in the Consumer Price Index (measured May to May), all Urban Consumers, Water and Sewerage Maintenance, published by the U.S. Department of Labor, Bureau of Labor Statistics (“Water and Sewer CPI”) over the prior year’s Water and Sewer CPI.

If implemented in full, the indexed rate increase to be effective October 1, 2021, would be 3.1%. However, the Ordinance also allows the Authority’s Board discretion to enact a lesser increase by resolution. After estimating the Authority’s operation, maintenance, debt service and capital needs for FY2021/2022 and beyond, a 2.5% indexed rate increase on the board approved June 2021 Rate Study rates for the coming fiscal year seems prudent and would provide for approximately \$1.45 million of additional revenue. In offering this recommendation, staff notes that for the ten-year period ending September 30, 2022, the cumulative rate index *allowed* by the Authority’s rate ordinance is 47.2%, compared to the *actual* 27.4% cumulative index, proposed and implemented.

Budget page I-1 titled “Part I – Budget Summary” outlines staff’s logic in presenting its rate indexing recommendation. Further explanation may be helpful.

The top section of this page is designed to capture estimated cash needs for the fiscal year, and the bottom portion to reflect the degree to which staff’s recommended indexed rate adjustment will help meet that need. Since the capital budget is prepared on a “project” basis, it can vary widely from year-to-year based on priorities and staff availability. Further, since it is funded by a combination of current revenue and reserve accounts, “Estimated Annual Depreciation Expense” as calculated by the Finance Department is a more reliable measure of annual renewal and replacement cash requirements.

Clearly, as the bottom of this page reflects, the recommended 2.5% indexed rate increase will not cover the projected FY2021/2022 shortfall, nor does it need to. The robust capital improvements program proposed in this budget would require approximately \$26.6 million or 24% reserve account balance transfer (based upon projected 10-1-21 balances), leaving a cash reserve account balance of approximately \$39.5 million, representing 294 days of operating capital.

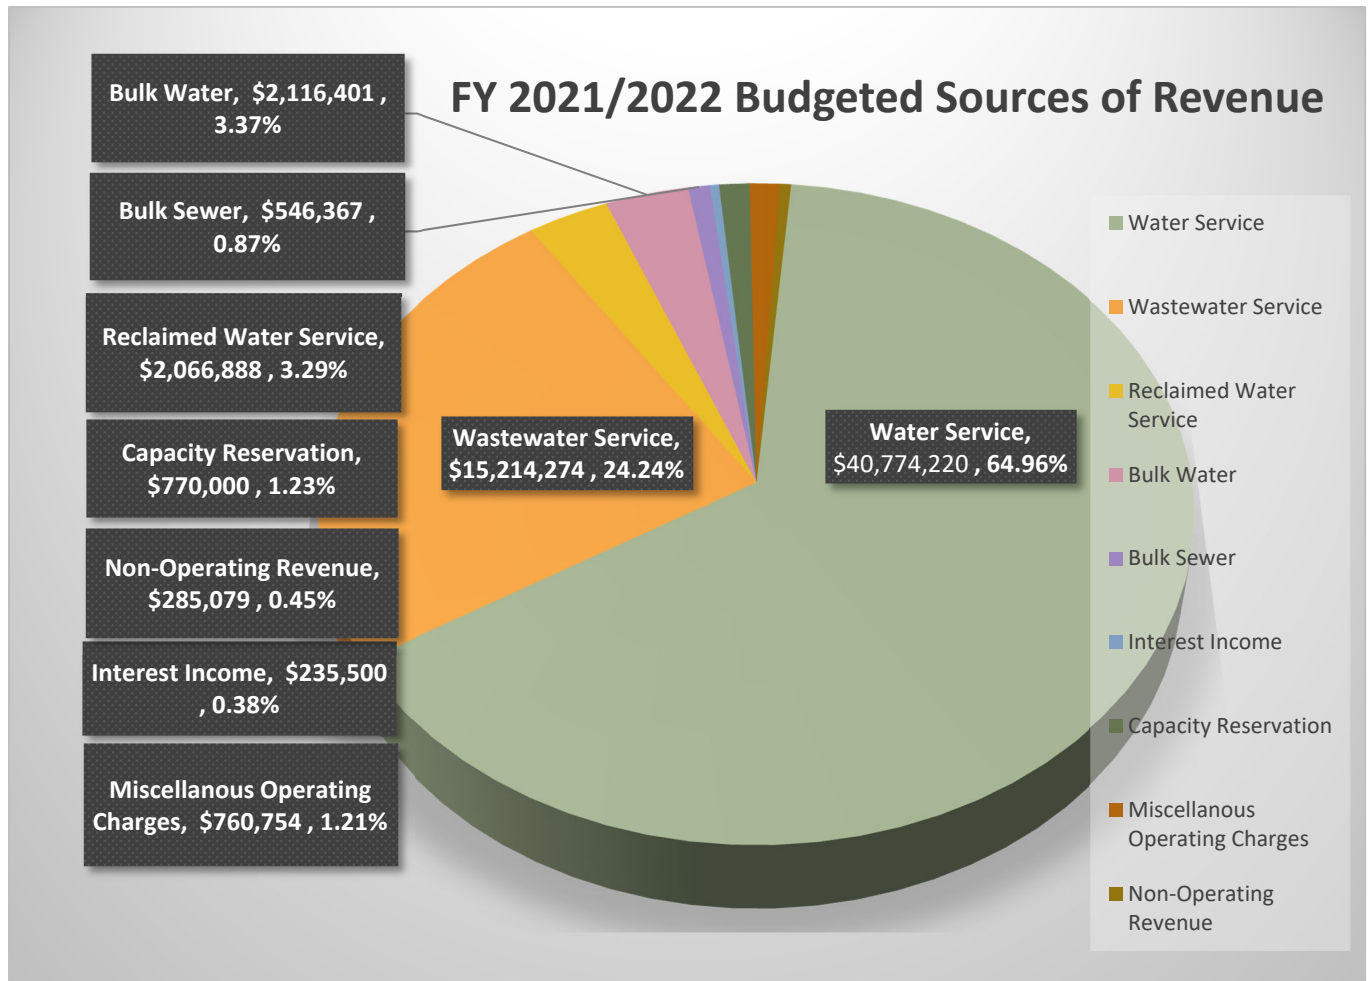

The budget proposes a five-year capital improvements program, the average annual cost of which will be approximately \$26.6 million. Despite this significant capital outlay, reserve balances will remain relatively stable through the planning period. Notably, all Authority debt will be retired by 2024, releasing approximately \$12.2 million in annual cash flow. It is the Authority’s long-range plan, described later in this summary, to apply funds currently spent on debt service to a systematic and prioritized replacement of its major roadway and secondary subdivision infrastructure. Detailed planning for this robust infrastructure program is presently underway.

BUDGET SUMMARY

Largely because of post COVID-19 business re-openings and a proposed October 1, 2021, 2.5% indexed rate increase, staff projects a FY2021/2022 revenue increase of 3.3% (page II-1) or \$2,044,606 over FY2020/2021 Budget. Furthermore, on the expense side, staff projects operating expenses to be 8.6% or approximately \$2.9 million greater than budgeted in the previous fiscal year. Increasing operating expense and the Authority’s aggressive infrastructure rehabilitation plans require withdrawal of approximately \$12.5 million of reserve funds. Sources and Uses of Funds are presented in the schedule below, supplemented by charts and narratives, summarizing major contributing factors.

REVENUE

Under the Authority's "cost of service" rate system, most revenue is derived from the fixed monthly base facility charges. This dampens the monthly revenue peaks and valleys associated with weather variations.

FY2021-2022 Water Revenue Assumptions:

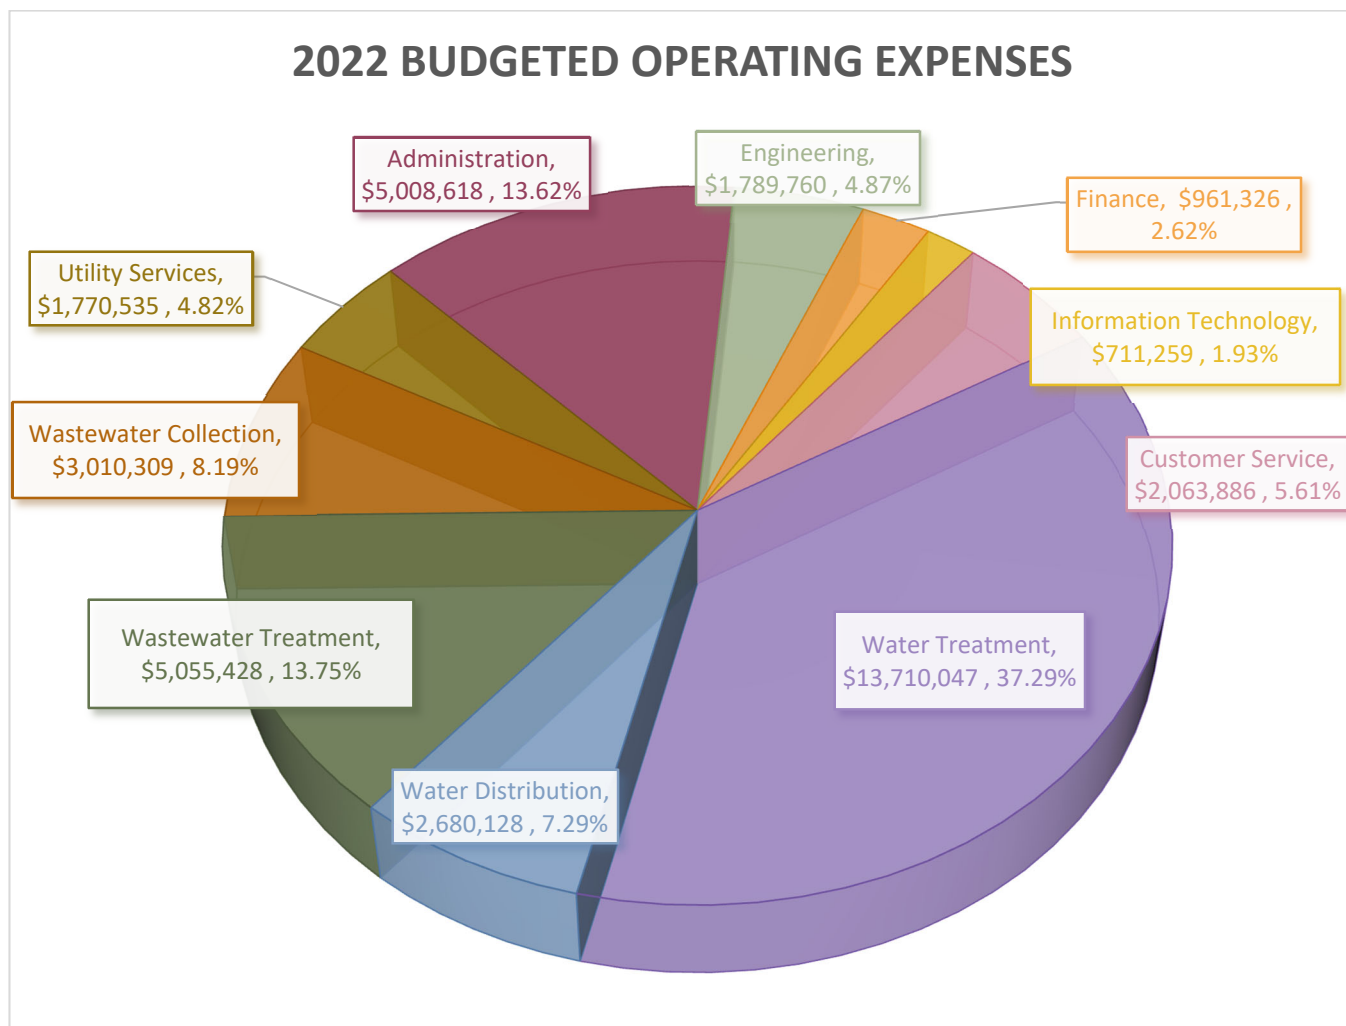

- Rates based upon the proposed June 2021 Cost of Service Study.
- Eastern Service area new units estimated at 300.
- Western Service area growth of 200 units all served by interconnection with Palm Beach County Water Utilities (Bulk Water/Sewer).
- Raw water consumption estimated based upon May 1, 2020, to April 30, 2021. Consumption increased for Non-Residential Customers due to businesses re-opening.
- Capacity Reserved by incoming potential customers is expected to remain the same as FY2020/2021.
- Reclaimed Water usage and contracts are expected to remain the same as FY2020/2021.

- Miscellaneous Operating Revenue:
 - Private System Maintenance contracts, which includes specialized contracted water and sewer services to various homeowner associations and Palm Beach Park of Commerce are expected to remain the same as FY2020/2021.
 - Administrative Fees charges are expected to increase because of system growth and a projected increase in Land Development Fees.
 - Miscellaneous billings for late fees, shut off notices, billable repairs, etc., are expected to remain the same as FY2020/2021.
- Non-Operating Revenue:
 - Interest income will be depressed by declining cash balances and historically low yields.
 - Miscellaneous Lease Payments in accordance with the terms of one cellular phone provider’s elevated water storage tank lease agreement.
 - Build America Bond Rebate Fees discontinued upon payment of the 2009 A&B Debt in March of 2020.
- Other Sources of Revenue:
 - Connection Charges for new customers connecting to the Authority’s system will decrease in FY2021/2022, as most charges for new developments have already been paid.

The table below compares budgeted revenue for FY2022 to FY2021.

EXPENSES

FY2021-2022 Major Expense Assumptions/Information:

- Electrical – based upon historical operating data, and an expected 10% increase over FY2020/2021.
- Treatment Chemicals – based upon estimated treatment demands and where possible in line with existing purchase contracts. Certain chemical costs are expected to rise by 20% in FY2021/2022.
- Bulk Water Purchase – expected to rise as the Authority now services three new communities, two previously serviced by West Palm Beach, adding 200 new customers and more industrial development in the Palm Beach Park of Commerce. These new customers receive both water and sewer service via the Authority’s bulk water and sewer purchase from Palm Beach County.
- Health Insurance Premiums – reflects a 10% increase in employee health insurance premiums.
- General Inflation – A general inflation rate of 3.0% has been applied where cost increases are unknown.
- Personal Services Budget – has several factors to consider. The following is a description of certain Authority compensation adjustment programs and how each is budgeted.

- Merit Adjustment/Proposed Merit Increases - Each Authority employee is evaluated annually on the employee’s employment anniversary date. Some employees are the top of their paygrade and will receive their merit increase via lump sum. Proposed Merit raises are as follows:

	Proposed FY 2021/2022	Comparative FY 2020/2021
Below Satisfactory	0.0%	0.0%
Satisfactory	0.0%	0.0%
Above Satisfactory	2.0%	2.0%
Excellent	3.0%	3.0%

- Longevity Pay – provides employees a lump sum payment of 0.1% of base pay for each continuous year of employment.
- Cost of Living Adjustment (COLA) – 2.5% is recommended for all employees effective April 1, 2022.
- PTO Leave Conversion-to-Pay Program – The Authority offers employees the opportunity to convert accrued PTO leave to pay each year.
- Shoe Allowance – proposed budget includes an annual shoe allowance of \$170 for 99 plant and field employees.
- Pension and 457 Deferred Compensation Pension Plans – will continue to be contributed at 8.0% of each eligible employee’s wages to the Money Purchase Pension (MPP, defined contribution) and matching of up to 2% (into the MPP) based upon the employee’s contribution made into the 457 Deferred Compensation Plan. These percentages remain unchanged from previous year’s budgets.
- Workers Compensation – is based upon a 2-year contract with budgeted increases due to salary increases.
- Disaster/Benefit Pay Contingency – will continue to be budgeted the same as FY2020/2021 to administer costs related to hurricane pay and other Authority emergency closures.
- Staffing – Increased personnel is considered for the Engineering, Finance, Water Distribution, Wastewater Collection and Administrative Departments. A total of 4 new positions and 2 promotions are proposed.

FINANCIAL/MANAGEMENT OVERVIEW

The Authority’s Bond Resolution requires that a net operating income to annual debt service ratio of 1.00 be maintained. As an additional requirement, this ratio jumps to 1.10 when guaranteed revenue, connection charges and interest income are added to normal operating income. These factors for FY 2021/2022 under the proposed budget will be 2.04 and 2.14, respectively, conforming to these critical requirements. Furthermore, the Authority’s annual debt service obligation for FY2021/2022 is budgeted to be \$12,240,125. This figure reflects the required debt service payment amounts resulting from the \$78 million Membrane Conversion Project debt issued in October 2009 (2009 A&B Bonds) and the related 2016 A&B Refunding.

CAPITAL BUDGET

Each budgeted capital project reflects staff’s estimate of the entire project cost. Once a project is approved and the purchase order for that project issued, the project will not appear in subsequent budgets unless additional funding is required. However, Budget page I-2 titled “Part I – Budget Summary” in the Revised Budget Column will reflect previously approved budgeted construction commitments that remain outstanding.

CAPITAL INVESTMENT ACCOUNTS

The Authority's May 2021 Renewal and Replacement (R&R) Account balance is \$2,000,000 down from last year's balance of \$5,205,034. R&R Funds must remain at this established balance, as required by the Authority's Bond Resolution. However, the diminished balance is not restricting renewal and replacement as evidenced by the proposed FY2021/2022 Capital Budget of approximately \$26.6 million.

The Capital Payments Account was established by the Authority's Bond Resolution (previously the Trust Indenture) to provide for system capacity expansion. Developer connection charge payments are held in this account until additional capacity is required or transferred for other purposes as described below. In late 2001, the board authorized an amendment to the Authority's Bond Trust Indenture (now the Bond Resolution) expressly authorizing the use of these funds, up to certain limits, to pay debt service costs. Transfers authorized by this amendment have previously zeroed out the Capital Payments Account, and funds received in FY2021/2022 will be exhausted similarly.

PROJECTS/PURCHASES

Highlighted capital projects and improvements funded from current revenue, R&R, and capital payments are described in the following sections. All capital expenditures are expected to be paid with current revenues or unrestricted reserves.

Water Treatment

Hood Road WTP Bio-Scrubber Installation

A recently completed engineering analysis concludes that the hydrogen sulfide (rotten egg smell) concentration of the Authority's deep Floridan aquifer water supply wells is significantly greater than initial testing revealed. This high loading has taxed the existing odor control scrubbers to their operational limit, and to fully utilize this water resource, additional odor removal capacity is required. Noting recent increases in chemical and operating costs for the Authority's existing wet scrubber systems and the odor control success the Authority has achieved at other locations using biofilters, staff proposes a \$4 million investment in replacement biofilter technology.

Water Distribution

Northlake Boulevard/US-1 Pressure Pipe Project, Phase 2

Phase 1 of this multi-year project replaced all Seacoast water and sewer force main within the Northlake Boulevard right-of-way from US-1 west to 10th Street. Phase 2 budget of \$2,000,000 for FY2021/2022, includes replacement of water and force main within the US-1 corridor from Kelsey Park northward to Northlake Boulevard.

Water Distribution Component Replacement

Components of the water distribution system sometimes fail or become inoperable. This may include valves, fire hydrants, large meter assemblies and water main sections. The FY2021/2022 budget allocates \$800,000 for the replacement of various capital water distribution system components.

Water Main Crossing at the C-17 Canal

Responding to the recent structural failure, the Florida Department of Transportation (FDOT) is planning to replace the US-1 Bridge crossing of the C-17 Canal (Earman River) within the next year. This project will require the Authority to replace its 10-inch water main presently fastened to the existing bridge structure. As FDOT has rejected the Authority's original plan to install a horizontal directional drill just inside the US-1 right-of-way, the proposed budget item provides for a horizontal directional drill along the west side of the Northlake (Wendy's restaurant property), under Northlake Boulevard, between two buildings on the River's north side, beneath the River, and across Village Gardens Condominium property, connecting to an existing main on South Anchorage Drive.

Wastewater Treatment (PGA WWTP)

PGA WWTP Centrifuge No. 2 and Belt Filter Press Elimination

Biosolids (sludge) generated by the plant's treatment process are dried and hauled off-site to Palm Beach County Solid Waste Authority (SWA) for processing as soil amendment or disposal. After decades of struggling to dry solids to SWA's threshold requirement, the Authority replaced one of its belt filter presses with a centrifuge. The result was immediate and dramatic, producing a much drier product, reducing hauling costs and eliminating SWA's concerns relating to high moisture content. The proposed budget allocates \$3 million to replace the remaining belt filter press with another centrifuge.

Wastewater Collection

Annual Sewer Lining and Rehabilitation Services

Efficient and effective utilization of a variety of restoration techniques including both slip lining and excavation of deteriorating pipelines as well as coating and replacement of deficient manholes has dramatically reduced infiltration, inflow, and sewer backups. Staff proposes a \$700,000 FY2021/2022 repair, renewal, and replacement budget.

Lake Park Force Main Replacement

Coordinating replacement of aging wastewater infrastructure with the Town of Lake Park's US-1 redevelopment plan, staff proposes a \$1.4 million capital budget allocation to install a new force main from Kelsey Park northwest to Jasmine Drive at Northlake Boulevard. This new force main will bring a direct connection of the eastern section of Lake Park to the master lift station; freeing up capacity in critical gravity sewer system.

Jasmine Force Main Crossing of Northlake and C-17

Continuing the pipeline described above, this separate and highly complex project would connect the north terminus of the newly installed force main with existing wastewater collection infrastructure in the Anchorage Park area. This proposed \$575,000 project includes a horizontal direction drill beneath Northlake Boulevard and the C-17 Canal, easement and right-of-way acquisition, and several other logistical, legal, and engineering challenges.

Lift Station no. 19 Force Main Replacement

Lift Station no. 19 is located on Trail Pines Avenue between Highland Pines and Arthur Street, north of Northlake Boulevard and west of Military Trail. The force main exiting that station to the west is aged, constructed of somewhat brittle material that the Authority no longer uses for this purpose, and is in an easement that is very challenging to access. The proposed capital budget requests \$400,000 to replace this force main with more durable material.

Force Main Replacements

The first phase of the Authority's multi-year effort to identify and correct critical force main (pressure sewer main) vulnerabilities is underway. The Authority owns and maintains 86 miles of raw sewage force mains. Certain segments are of material which, if not meticulously inspected, maintained, and replaced where needed, could corrode and rupture. Such failures potentially expose persons, property, and the environment to risk of infection and contamination – thus, extraordinary staff time is consumed in maintenance activities. Replacement with modern, more corrosion resistant materials will reduce such risk. The proposed FY2021/2022 budget for this project is \$1,000,000.

Lift Station Telemetry Communication Improvements

The Authority's existing proprietary lift station control system was state of the art when it was first installed over 30 years ago. Competition and technological advances have produced SCADA and control systems that are more reliable, provide better security and allow for an open programming architecture. The Authority has selected VT SCADA as the new platform with more secure radio and cellular communication systems. The proposed budget of \$3.5 million will fund the first phase of the Authority's program to upgrade SCADA technology to all 159 lift stations.

General & Administration – Engineering, Finance, Information Technology, Customer Service

Western Service Area Maintenance Facility

The Authority has secured a site within the Avenir development to stage equipment and supplies, allowing a more rapid response to emergencies and customer service needs. This property, adjacent to a City of Palm Beach Gardens parcel, will include a communications tower funded by the City of Palm Beach Gardens, a small office, vehicle and equipment storage, and space for water storage and repumping if necessary. The \$1.075 million capital budget appropriation will fund certain site improvements including paving, drainage, fencing and landscaping. Additional improvements will be made later.

SUMMARY

The proposed FY2021/2022 Budget fully funds the Authority's operation, maintenance, and capital needs, requiring a 2.5% rate increase to the 2021 Rate Study rates and withdrawal of approximately \$12.5 million in reserve funds. The proposed rate adjustment is fully authorized by the Authority's rate ordinance, and though some reserve funds will be used, unrestricted cash will remain at approximately \$39.5 million or 294 days of operating capital, well exceeding the required 90 days.

Proposed Revenue Totals - Notes

Note # Note

Water Service

The revenue projections reflect a proposed rate structure to be adopted September 22, 2021 with a 2.5% annual index applied.

The "# of meters and/or units" are based on actual figures as of May 1, 2021. Staff estimates approximately 300 additional customers during FY 2021-2022. It is also assumed that all new customers will receive both water and sewer service. Revenue for additional meters is projected at 50% to account for the distribution of connections throughout the fiscal year.

Projected water consumption is based upon actual consumption for the 12 months ending April 30, 2021.

The "monthly charge" is the base facility charge which, varies according to meter size for single family and non-residential customers. The base facility charge for multifamily customers is either \$11.70 or \$17.46 per month based upon the type of multifamily unit regardless of the meter size. The point of service charge is a flat rate of \$2.27 per month per meter for all customers. It is designed to recover the Authority's cost of reading the meter and billing the account. It has no relationship to actual water usage by the customer.

Sewer Service

The revenue projections reflect a proposed rate structure to be adopted September 22, 2021 with a 2.5% annual index applied.

The "monthly charge" is the base facility charge which, varies according to meter size for non-residential customers. The monthly base facility charge is \$19.24 for single family customers and \$10.44 or \$15.59 for multifamily customers, based upon the type of multifamily dwelling, regardless of water meter size. The point of service charge is a flat rate of \$2.04 per month, per meter for all customers.

The "# of meters and/or units" are based on actual figures as of May 1, 2021. Staff estimates approximately 300 additional customers during FY 2021-2022. It is also assumed that all new customers will receive both water and sewer service. Revenue for additional meters is projected at 50% to account for the distribution of connections throughout the fiscal year.

Summary

- 1 Private fire protection revenue is based upon the estimated number of fire lines to be in service at \$30.39 per month per fire line, which includes a point of service administrative charge of \$2.27.
- 2 Large meter fees are charges to customers for the purchase of meters that are 3" or larger. Estimated amount based upon historical transactions.
- 3 Guaranteed revenue results from developer agreements, for those developers that desire to reserve system capacity. Budgeted FY 2021-2022 revenue assumes that approximately 90% of currently active agreements will renew.
- 4 Miscellaneous water revenue consists of service charges (service initiation fees, disconnects, return check charges, etc.) and late fees. FY 2021-2022 Budget is based upon 90% of FY 2020-2021 estimated actual.
- 5 Reclaimed water revenue figures are based on actual billing from May 1, 2020, through April 30, 2021.
- 6 Bulk water service fees recovered from customers in the Authority's western service area.
- 7 Bulk sewer service fees recovered from customers in the Authority's western service area.
- 8 Administrative fees are calculated as the greater of 4% of connection charges or \$2,300; and are collected to offset the administrative engineering costs of plan review and inspections performed by Authority staff.
- 9 Guaranteed revenue results from developer agreements, for those developers that desire to reserve system capacity. Budgeted FY 2021-2022 revenue assumes approximately 90% of all currently active agreements will renew.
- 10 Non-operating miscellaneous revenue consists of trade discounts taken on timely vendor remittances, reimbursements for work-orders, fees collected for lien searches, etc. The level of activity for FY 2021-2022 is expected to be 90% of the FY 2020-2021 estimated revenue.
- 11 Park of Commerce revenue is generated from charges assessed for maintenance services provided to the development.
- 12 Bad debts collected revenue is generated through collection of funds from uncollected accounts receivable that had been previously written off.
- 13 Miscellaneous lease payments are fees that are collected for the use of antenna space on the Authority's water tower.
- 14 Build America Bond rebate final interest payment was received in March of 2020.
- 15 Unrestricted interest income is calculated using an estimated yield on projected average cash and investment balances of unrestricted accounts.
- 16 Restricted interest income is based upon an estimated yield on projected average cash and investment balances of restricted accounts.
- 17 Private system maintenance contracts for specialized services within certain communities. Revenue is based upon agreed upon specific contract terms.
