

SEACOAST UTILITY AUTHORITY SILVERTHORNE DRIVE WATER MAIN EXTENSION

Seacoast Utility Authority
Holtz Consulting Engineers, Inc

ABOUT THE PROJECT

Seacoast Utility Authority is constructing a new 6-inch water main along Silverthorne Drive, extending from Bedford Drive north to the existing fire hydrant. The project will improve system reliability and expand the availability of water service within the community.

PROJECT BREAKDOWN

- ✓ Constructing a 6-inch water main along Silverthorne Drive to improve the reliability of the community's drinking water distribution system.
- ✓ Construction activities will primarily occur within existing public rights-of-way and designated utility easements. Disturbed areas will be restored following construction.
- ✓ The project includes connections to the existing water distribution system and associated improvements necessary to place the new water main into service.

BENEFITS OF THE PROJECT

- ✓ The new water main extension will improve connectivity within the existing distribution system and expand access to available water service.
- ✓ The project provides infrastructure for properties along Silverthorne Drive to connect to the public water system where service was not previously available.

WHAT THIS MEANS FOR YOU

- **Traffic impacts:** We will work to minimize disruptions, but temporary roadway shoulder closures may occur during construction.
- **Construction Noise:** Construction activities may generate daytime noise. Normal construction hours are 8:00 AM-5:00 PM, Monday through Friday.
- **Restoration:** Areas disturbed by construction, including landscaping, irrigation, driveways, and pavement, will be restored as required following construction.
- **Property Access:** Access to homes will be maintained to the extent practical during construction.

PROJECT TIMELINE

- Selected Contractor: **Johnson-Davis, Inc.**
- Construction Duration: **Approximately 2 Months**
- Start Date: **October 2026**
- Projected End Date: **December 2026**
